To prevent multiple charges, you should only press the "Make Payment" button once.

Your customers prefer to pay your invoices via the web. Until now, providing e-bills was costly and disruptive to your current systems.

IDM's E-Bill Presentment and Payment (iBill) system lets you provide e-bills for your customers with no changes to your current systems. Simply provide your invoice or statement data from your current system. We will take care of the rest.

- Email notifications sent to your customers
- E-bills look exactly like their paper counterparts.
- Bills can be kept on-line indefinitely. Your customers can review, print and pay their bills on-line at any time.
- Payments can be made with a credit card or electronic check. Payments are processed into your account immediately. Customers can sign up for automatic payments too.
- No need to create a complex, separate security system for e-bills. "The bill is the password."
- IDM iBill can be imbedded in your existing web site.

Your e-bills are processed by IDM and hosted on our secure servers. Our multi-location datacenters provide continuous uptime. We are certified as a Visa International (CISP) end-point, offering the **highest level of security**.

The cost to provide e-bills is much lower than paper bills. Payment fees are the same as your current system for credit card and EFT transactions. The typical Return on Investment (ROI) for IDM E-bills is greater than 200%.
